Making a Difference: Educational Practices That Work!

The Pennsylvania Department of Education
Bureau of Special Education
Annual Conference 2013

Three days of intensive learning with educators who are making a difference for all students.

Wednesday, March 6 through Friday, March 8, 2013
Hershey Lodge and Convention Center
Positive Exposure: The Spirit of Difference

Rick Guidotti

Insults, fear, discrimination, and hatred based on genetic, physical, and behavioral differences plague our society. In this session, Mr. Guidotti will explain how Positive Exposure attacks public fears about difference with positive images and powerful life stories. Utilizing photography and video interviews, Positive Exposure’s innovative approach challenges the stigma associated with difference. This presentation will make your reexamine your idea of beauty.

In 1998, Rick Guidotti founded Positive Exposure, a nonprofit organization that challenges stigma associated with difference by pioneering a new vision of the beauty and richness of genetic diversity.

How Leaders, Teachers, and Students Make Learning Visible

Brian A. McNulty, Ph.D.

Drawing on the largest body of international educational research ever created, participants will explore specific techniques for identifying the impact that leaders, teachers and, most importantly, students have on learning. During this interactive presentation, participants will have the opportunity to examine their own knowledge and beliefs about teaching and learning.

Dr. McNulty is vice president of leadership development for The Leadership and Learning Center. An author of more than 40 publications, Dr. McNulty’s most recent books include, Leaders Make It Happen, with Laura Besser and School Leadership that Works: From Research to Results, co-authored with Robert Marzano and Tim Waters.

The Future is Beautiful

Jesse Schell

Mr. Schell’s presentation will provide a description of four key 21st century trends (beauty, sharing, customizing, and authenticity) that are transforming the world, and that are necessarily transforming education along with it. Through the use of concrete examples, he will paint a picture of how technology will help to create the geniuses of the 21st century, and how we can all be a part of the revolution.

Mr. Schell is the CEO of Schell Games, the largest game studio in Pennsylvania and a member of the faculty at the Carnegie Mellon University Entertainment Technology Center.
